EXECUTIVE SUMMARY

I described myself as a highly skilled IT professional and expert on the developing of small and medium Enterprise Applications. I am also a talented and genuine data mining professional who is able to work under pressure and rush hours with no confusion. In addition, I have worked on a number of projects as part of a team as well as individually and I was the active project manager of these Projects and during this period, I have branded myself as a reliable and effective member in the team. As a result, I was hired by a number of private and government-owned institutions to assist them with the management of their IT department and projects as well. In short, I have 5+ years working experience in ICT Management, Project management, Software Development, Database Administration, Data analyst, Artificial Intelligence, Big Data management and Data science.

EDUCATION

MSc. Computer Science and Applied mathematics

2017-2018

University of the Witwatersrand, South Africa

In this degree, I focused on project management, data analysis, big data management, Artificial Intelligence and data science.

BSc honours. Computer Science
